AMERICAN WALTHAM WATCHES.

We claim and are prepared to prove that the American Watches manufactured at Waltham. Massachusetts, are not only equal, but far supebest of Native Wine; Choice Lager and rior, to the watches of England, Switzerland and France. We also, claim that they are CHEAPER, MORE ACCURATE, MORE DURABLE, and more easily kept in order and repaired than any other watches in the market. Because in each one of the very numerous parts

of which a watch is made up, we attain, by me chanical power, nearly absolutemathematical preision and uniformity, making every watch of any one style a true copy of its model.

This similarity in structure reduces the cost of production; it secures uniformity in results: if perpetuates and infallibly diffuses any excellence that may be once achieved, and makes it easy to repair any injury sustained, or replace any part that may be lost or destroyed

In addition to these mechanical advantages, our Watches are simpler in structure, and therefore stronger, and less likely to be injured than foreign watches. How they run under the hardest trial watche

on have, is shown by the following letters: PENNSYLVANIA RAILROAD COMPANY

OFFICE OF THE GENERAL SUPERINTENDENT, ALTOONA, PA., 15th December, 1896. Gentlemen: The watches manus actured by averbeen in use on this trailroad for several by our enheurs in use on this trailroad for several by our engineemen to whom we turnish wat is part of our squipment. There are now in true hundred of them carried on our line, we consider them good and reliable time fee fundered. LOCOMOTIVE DEPARTMENT, WEST DIVISION, ROCHESTER, Dec. 24, 1866.

Gentlemen: I have no hesitation in saying that thelieve the great majority of Locomotive Engineers have found by experience that Waltham Watches are the most satisfactory of any fortheriuses. They run with the greatest accuracy and steadiness, notwithstanding the rough riding of as engine, and as I have never known onto twenty out they must be durable. I hope to see the time when Hallway Companies will generally adopt your watches, and fornish them to all engineers and conductors. In my opinion it would greatly tend to promote regularity and safety.
